2 This limited warranty extends to the original owner (original owner means the contractor/dealer/distributor/purchaser and the initial owner of the structure where the product is initially installed) and is transferable to two subsequent structure owners. JELD-WEN manufactures premium, long lasting, exterior wood composite MiraTEC Trim. The products have been engineered to provide years of satisfaction and performance when properly maintained. To ensure compliance with the provisions of the MiraTEC Limited Warranty the following Homeowner Maintenance must be performed.

AN ANNUAL INSPECTION OF THE TRIM TO INCLUDE THE FOLLOWING:

- 1) Condition of Caulk and Sealant:** Loose and cracked caulk or sealant must be removed and replaced with a good quality, polyurethane sealant. Do not use hard-setting caulk.
- 2) Presence of Mildew:** Mildew is a living organism (fungus) that grows on the surface of finishes giving the paint a darkened, dirty appearance. Do not paint over mildew without cleaning the MiraTEC Trim with a mildew cleaning solution. Mildew cleaning solutions, available at local paint, lumber and hardware stores, will help retard and control this growth. The control of mildew on the surface of MiraTEC Trim is a homeowner responsibility. JELD-WEN, Inc. will assume no responsibility for the treatment or prevention of mildew.
- 3) Condition of Painted Trim:** MiraTEC Trim are manufactured from wood and are primed. MiraTEC Trim must be painted with an exterior coating designed for use on wood trim. Periodic washing of factory-finished or field painted MiraTEC Trim with water and mild detergent will remove accumulated dirt. The condition of the paint must be inspected and maintained as noted in the following table.

CONDITION OF PAINT	ACTION REQUIRED
Good condition/unbroken	Clean and remove dirt
Thin, but unbroken finish	Clean and apply two topcoats
Badly eroded, substrate showing	Clean, prime, apply two topcoats
Crack, flaking, substrate exposed	Remove loose paint film, clean, prime, and apply two topcoats

FINISH SELECTION:

PRIMER – Use an exterior oil or water based primer formulated for use on wood composite products which will seal the surface and is compatible with the topcoat finish to be applied.

TOPCOATS – Use low or non-chalking exterior acrylic latex paint, low chalking acrylic or acrylic heavy bodied latex stain, or gloss or semi-gloss oil base paint. All exposed MiraTEC Trim surfaces, including the bottom edges, must be well coated.

Do not use shake and shingle paints, flat oil or flat alkyd paints, vinyl acetate (PVA) vinyl acrylic, or vinyl acetate-acrylic copolymer paints, oil base transparent or opaque stains.

Due to variables involved in field application of finishes, JELD-WEN cannot be responsible for the performance of field-applied coatings.

- 4) Water Drainage/Diversion:** Allowing water from roofs and sprinklers to run down the surface of the MiraTEC Trim can cause discoloration and accelerated erosion of the paint. Locate landscape sprinklers so that water will not hit the MiraTEC Trim.

Appropriate action(s) must be taken to remedy any of the above noted conditions or we may deny warranty claims for any resulting damage.
